

# Infrastructure Management Software Solutions

## System and Core Infrastructure Applications

Centrify enables a secure, connected computing environment by seamlessly integrating your Unix, Linux, Mac, Java and web platforms with Microsoft Active Directory's identify, access and policy management services. Centrify DirectControl delivers the only solution that does not require intrusive reconfiguration of existing systems and provides the granular administrative control needed to securely manage a diverse set of systems and applications.

Citrix offers a dynamic end-to-end virtualization system that transforms desktops and applications into on-demand services enabling users to work securely and productively from anywhere. Citrix virtualization revolutionizes desktop management and simplifies data-center operations, cutting costs up to 50%.

Nimsoft Monitoring Solutions offers the ability to monitor the performance and availability of the entire IT infrastructure, both physical and virtualized. With unparalleled combination of efficiency and scalability, Nimsoft can address virtually any monitoring requirement – from a few servers to several network operations centers.

Sirana Software offers solutions that enable customers to perform detailed, business-focused reporting and analysis of their email and messaging systems. These solutions ease the day-to-day administrative burden, reduce IT staff workload, improve capacity management and upgrade/migration planning, and help ensure compliance with acceptable use policies and industry regulations across Microsoft Exchange, RIM Blackberry and Sendmail messaging environments.

Splunk is software that provides unique visibility across your entire IT infrastructure from one place in real time. Only Splunk enables you to search, report, monitor and analyze streaming and historical data from any source. Now troubleshoot application problems and investigate security incidents in minutes instead of hours or days, monitor to avoid service degradation or outages, deliver compliance at lower cost and gain new business insights from your IT data.

VMware can reduce IT costs while maintaining control without being locked into limited choices of operating systems, applications and hardware. VMware solutions can reduce hardware and the time it takes to provision new servers which decreases downtime and improves reliability with business continuity and built-in data disaster recovery.

Web-smart organizations worldwide depend on WebTrends to improve their web site conversions and optimize their marketing performance for maximum return on investment. WebTrends has become the trusted standard not only for award-winning technology, but also for a full range of consulting services and unmatched industry expertise.
