

Delivering Storage Solutions

Storage Network Environment

Acronis is a world leader in providing advanced, scalable storage management and disaster recovery software that helps enterprises safeguard their information and assures the availability, security, integrity and recoverability of the infrastructure. True Image is a leading disk-imaging and restore solution for Windows and Linux services.

BlueArc provides high performance unified network storage systems to both enterprise and data intensive markets. BlueArc supports both NAS and SAN services on a converged network storage platform. They replace complex systems with high performance, scalable systems capable of handling the most data intensive environments. BlueArc's energy efficient design and ability to consolidate legacy storage infrastructures will increase storage utilization but reduce cost of ownership.

CommVault is the only software company focused exclusively on data management. CommVault is able to fix existing backup problems that will enable companies to better manage data through an entire lifecycle for unprecedented control over data growth, costs and risk. CommVault software makes it possible to provide more access to users across all tiers of storage, which raises the value of managed data to your business.

Compellent Technologies is a provider of affordable, modular storage solutions which enables the simultaneous mixing and matching of any server interfacier drive technology. Their products have the ability to mix and match iSCSI and Fibre Channel server access in a single SAN drive. Compellent is focused on delivering storage solutions that reduce up-front expenditures, streamline administration, automate data recovery, and deliver modular, unbounded scalability.

FedTek is now an Elite Partner with HP, a known technology solutions provider. HP storage offers scalability to multiple terabytes of capacity and high-performance with a fully integrated suite of centralized management tools for greater administrative control. HP acquired LeftHand Networks and now can provide cost-effective, modular data storage systems that are easy to install and manage. HP meets the needs of cloud computing with their Converged Infrastructure which includes 3PAR and TippingPoint.

QLogic Corporation simplifies the process of networking storage. With the vision of a SAN in every business, QLogic produces the controller chips, host bus adapters (HBAs), fabric switches and management software that are the backbone of storage networks for most Global 2000 corporations.

Qualstar has provided backup, archive storage, and disaster protection for thousands of customers around the clock, worldwide. Qualstar tape libraries are compatible with virtually every operating systems and platform, and are supported by application packages for all leading developers.

Quantum solutions combine the most reliable and cost-effective technologies with ease of integration. Quantum can protect your business-critical data with scalable systems and are the world's largest volume supplier of both tape drives and tape automation. They pioneered the development of disk-based virtual tape systems optimized for faster backup and recovery.

Tandberg Data is a leading global supplier and manufacturer of backup and archiving solutions. They offer secondary storage products based on tape drives, autoloaders, libraries, media, disk-based solutions, software and hardware components for mainstream configurations. Upon combining with Exabyte customers now have a full range of cost-effective products and technologies.
