Delivering the Decisive Edge On ITS-SB Task Areas & Team Capabilities

EPEAT:

SNVC is currently delivering worldwide Electronic Product Environment Assessment Tool (EPEAT) support through our Enterprise Operations and Security Services (EOSS) contract. From battery recycling and managing end-of-life tasks for computer disposal to managing upgrades to the National Guard's EOSS enterprise, SNVC has worked diligently to utilize the EPEAT to identify compliant hardware for DoD screening. Moreover, Team member Bearing Point has specific EPEAT capability in server virtualization, data center design, architecture, and asset and facility management.

Information Assurance:

SNVC has performed or managed a myriad of Information Assurance (IA) activities to include: CAC, PKI, vulnerability assessments, IAVA management, network and firewall design for intrusion prevention, software and system architecture design to meet security requirements, assessments to ensure DITSCAP/DIACAP compliance, biometrics (PKI, PKE, CAC) focused on IT and physical security access. Disaster recovery and continuity of operations related IA has included support to the AKO enterprise. Team members with additional IA capabilities include: AT&T, EDC Consulting, and GRSi.

IV&V:

SNVC utilizes ISO compliant methodologies for all Independent Verification & Validation (IV&V) efforts which have resulted in early identification of issues to all programs. Previous IV&V Contracts include: NBG RCAS/DTTP IV&V, GCSS-Army IV&V, and GFEBS IV&V. SNVC's IV&V approach is used to conduct analysis of existing artifacts, develop software test plans, and review functional requirements. Results are imported into our tools for further analysis of high risk areas for IV&V. Team members with additional capabilities include: EDC Consulting, Fed Concepts, and ISIS.

Additional Task Areas & Capabilities:

- IPv6 Engineering Services
- Migration/Integration IT Services
- Warranty & Maintenance
