

FedTek offers a wide array of Data Center, Security and Network Solutions from strategy and planning to design and implementation with trained and certified engineers to fulfill your requirements.

FedTek specializes in providing enterprise wide storage management solutions

- Project Management
- Systems Integration
- Deployment
- Training
- Staff Augmentation

Professional Services include:

- Engineers that deliver Storage Management, Applications and Security Management Solutions
- Application-level monitoring of Windows /Unix environments
- Security policy and compliance solutions
- Solutions that manage multi-vendor storage devices and servers
- High performance tape backup and recovery solutions
- Data Center Consolidation
- Assessment Services
- Cloud Computing

Public Sector

Specialist

FedTek is now a Public Sector Specialist with HP, a known technology solutions provider. HP storage offers scalability to multiple terabytes of capacity and high-performance with a fully integrated suite of centralized management tools for greater administrative control. HP acquired LeftHand Networks and now can provide cost-effective, modular data storage systems that are easy to install and manage. HP meets the needs of cloud computing with their Converged Infrastructure which includes 3PAR and TippingPoint.

 Barracuda Networks, Inc. has products that span three distinct markets: 1) content security, 2) networking and application delivery and 3) data storage, protection and disaster recovery. They maintain their strong heritage in email and web security appliances but their portfolio includes more than a dozen purpose-built solutions that support every aspect of the network. This gives organizations of all sizes true end-to-end protection in hardware, virtual, cloud and mixed form factors.

 Citrix offers a dynamic end-to-end virtualization system that transforms desktops and applications into on-demand services enabling users to work securely and productively from anywhere. Citrix virtualization revolutionizes desktop management and simplifies datacenter operations, cutting costs up to 50%.

 Compellent Dell Compellent Storage Center can dynamically scale to meet business requirements and support new technologies on a single, modular storage platform so organizations no longer have to rip and replace hardware when their business needs a change. Administrators can utilize a range of front-end interconnects and hardware components with advanced failover features so that there is no single point of failure for high data availability.

 Intelligent Computer Solutions (ICS) is the technology leader in design and manufacture of high-speed Hard Drive Duplication equipment, Software Cloning Solutions and Diagnostic Systems. ICS is a prominent supplier of Law Enforcement & Computer Forensic Systems to law enforcement personnel ranging from local police departments to Federal and International agencies.

 NetIQ. NetIQ, an Attachmate business, is a leading provider of comprehensive systems and security management solutions that help enterprises maximize IT service delivery and efficiency.

 NComputing NComputing solutions take the guesswork out of desktop virtualization by positioning the right solution for your needs quickly, within budget and with your green computing desires in mind. Spanning education to the enterprise, NComputing provides proven, reliable and robust solutions for organizations worldwide.

 Overland Storage is a leading global supplier and manufacturer of backup and archiving solutions. They offer secondary storage products based on tape drives, autoloaders, libraries, media, disk-based solutions, software and hardware components for mainstream configurations. Upon combining with Exabyte customers now have a full range of cost-effective products and technologies.

 QLogic Corporation simplifies the process of networking storage. With the vision of a SAN in every business, QLogic produces the controller chips, host bus adapters (HBAs), fabric switches and management software that are the backbone of storage networks for most Global 2000 corporations.

 Qualstar has been designing and manufacturing the world's finest tape products since 1984. Their TLS-Series SANSmart Automated Tape Library Families provide backup, archive storage, and disaster protection for thousands of customers around the clock, worldwide. Qualstar tape libraries are compatible with virtually every operating system and platform, and are supported by applications packages from all leading developers.

 Quantum solutions combine the most reliable and cost-effective technologies with ease of integration. Quantum can protect your business-critical data with scalable systems and are the world's largest volume supplier of both tape drives and tape automation. They pioneered the development of disk-based virtual tape systems optimized for faster backup and recovery.

 Red Hat is the world's leading provider of open source solutions, using a community-powered approach to provide reliable and high-performing cloud, virtualization, storage, Linux® and middleware technologies. They began as a better way to build software and today is the world's most trusted provider of open source technology.

 Secure Vantage Technologies is the #1 solutions provider of IT security and auditing technology for the Microsoft enterprise data-center and cloud based initiatives. From security monitoring and event collection to IT GRC auditing and compliance, SVT provides the important tools needed to achieve IT GRC alignment. It also eliminates silos of information and disconnected processes as well as reducing manual activities and costs.

 Sirana Software offers solutions that enable customers to perform detailed, business-focused reporting and analysis of their email and messaging systems. These solutions ease the day-to-day administrative burden, reduce IT staff workload, improve capacity management and upgrade/migration planning, and help ensure compliance with acceptable use policies and industry regulations across Microsoft Exchange, RIM Blackberry and Sendmail messaging environments.

 Unitrends has the industry's greatest breadth of innovative purpose-built data protection products for unmatched backup, archiving, disaster recovery, and business continuity. Our offerings include physical appliances, virtual appliances and software, and cloud storage and DRaaS (Disaster Recovery as a Service).

 VMware can reduce IT costs while maintaining control without being locked into limited choices of operating systems, applications and hardware. VMware solutions can reduce hardware and the time it takes to provision new servers which decreases downtime and improves reliability with business continuity and built-in data disaster recovery.

 Organizations worldwide depend on Webtrends to improve their web site conversions and optimize their marketing performance for maximum return on investment. Webtrends has become the trusted standard not only for award-winning technology, but also for a full range of consulting services and unmatched industry expertise.

Available on GSA Schedule and SEWP IV and V

Allied Telesyn	QLogic
AlterPoint	Qualstar
Bakbone	Quantum
Barracuda	Red Hat
Brocade	Ricoh
CA	Savision
Cables To Go	Secure Vantage Technologies
Dell Compellent	Seneca Data
Hitachi Data Systems	Sirana
HP	SONY
ICS	Symantec
Imation	Tandberg Data
In Focus	Toshiba
Lenovo	Unitrends
Lexmark	Viewsonic
McAfee	VMware
NetApp	Webtrends
NetIQ	Xerox
Ncomputing	
Panasonic	

Many other products are available with open market pricing.
