

RackTop Systems Partners with FedTek a Leading Federal Solutions Provider

FULTON, MD and WOODBRIDGE, VA – April 22, 2013 – RackTop Systems, a manufacturer and market-leader in data center technologies, today announced a strategic federal partnership with FedTek, a woman owned small business specializing in providing enterprise storage management solutions. The partnership provides great opportunity for the delivery of data center solutions made here in the USA to meet the specific needs of the Government, which are often unique and sometimes misunderstood by vendors who don't have the same deep knowledge of government operations.

"RackTop's suite of products covering data storage, virtualization, and continuity of operations are a great complement for our mission to provide the Government with the very best solutions for their data center needs," said Scott Deen, president of FedTek. "RackTop simply builds great products here in the USA with a controlled supply chain; the founders of RackTop's previous government experience has driven them to provide unique COTS products that nobody else offers"

"As more departments and agencies seek to better manage and secure their vast and exponentially growing data assets, more are turning to RackTop because of the combination of our value focused products, solutions approach, and domain expertise. RackTop chose FedTek as a strategic federal partner because of their similar solutions focus, commitment to the government customer, and experiencing delivering successful Government data center solutions," said Eric Bednash, CEO RackTop Systems.
