FedTek
Dynamic IT Solutions

FedTek offers a wide array of Data Center, Security and Network Solutions from strategy and planning to design and implementation with trained and certified engineers to fulfill your requirements.

FedTek specializes in providing enterprise wide storage management solutions

- Project Management
- Systems Integration
- Deployment
- Training
- Staff Augmentation

Professional Services include:

- Engineers that deliver Storage Management, Applications and Security Management Solutions
- Application-level monitoring of Windows /Unix environments
- Security policy and compliance solutions
- Solutions that manage multi-vendor storage devices and servers
- High performance tape backup and recovery solutions
- Data Center Consolidation
- Assessment Services
- Cloud Computing

FedTek is a Gold Partner with HPE, a known technology solutions provider. HPE storage offers scalability to multiple terabytes of capacity and high-performance with a fully integrated suite of centralized management tools for greater administrative control. HPE acquired Nimble Storage and Simplivity, expanding their software defined capabilities cloud services. Simplivity is a hyperconverged solution combining compute, storage and networking into a single system. Nimble Storage offers predictive all-flash and hybrid-flash storage solutions.

Barracuda Networks, Inc. has products that span three distinct markets: 1) content security, 2) networking and application delivery and 3) data storage, protection and disaster recovery. They maintain their strong heritage in email and web security appliances but their portfolio includes more than a dozen purpose-built solutions that support every aspect of the network. This gives organizations of all sizes true end-to-end protection in hardware, virtual, cloud and mixed form factors.

Dell EMC can dynamically scale to meet business requirements and support new technologies on a single, modular storage platform so organizations no longer have to rip and replace hardware when their business needs a change. Administrators can utilize a range of front-end interconnects and hardware components with advanced failover features so that there is no single point of failure for high data availability.

NetIQ, a Micro Focus business, is a leading provider of comprehensive systems and security management solutions that help enterprises maximize IT service delivery and efficiency.

Overland Storage is a leading global supplier and manufacturer of backup and archiving solutions. They offer secondary storage products based on tape drives, auto-loaders, libraries, media, disk-based solutions, software and hardware components for mainstream configurations. Upon combining with Exabyte customers now have a full range of cost-effective products and technologies.

Qualstar has been designing and manufacturing the world's finest tape products since 1984. Their TLS-Series SANSmart Automated Tape Library Families provide backup, archive storage, and disaster protection for thousands of customers around the clock, worldwide. Qualstar tape libraries are compatible with virtually every operating system and platform, and are supported by applications packages from all leading developers.

Quantum solutions combine the most reliable and cost-effective technologies with ease of integration. Quantum can protect your business-critical data with scalable systems and are the world's largest volumne supplier of both tape drives and tape automation. They pioneered the development of disk-based virtual tape systems optimized for faster backup and recovery.

Red Hat is the world's leading provider of open source solutions, using a community-powered approach to provide reliable and high-performing cloud, virtualization, storage, Linux® and middleware technologies. They began as a better way to build software and today is the world's most trusted provider of open source technology.

Unitrends has the industry's greateast breadth of innovative purpose-built data protection products for unmatched backup, archiving, disaster recovery, and business continuity. Our offerings include physical appliances, virtual appliances and software, and cloud storage and DRaaS (Disaster Recovery as a Service).

VMware can reduce IT costs while maintaining control without being locked into limited choices of operating systems, applications and hardware. VMware solutions can reduce hardware and the time it takes to provision new servers which decreases downtime and improves reliability with business continuity and built-in data disaster recovery.

Organizations worldwide depend on Webtrends to improve their web site conversions and optimize their marketing performance for maximum return on investment. Webtrends has become the trusted standard not only for award-winning technology, but also for a full range of consulting services and unmatched industry expertise.

Available on GSA Schedule and SEWP V

Adobe	McAfee
