

Commitment to Quality Earns FedTek New ISO:9001 Certification

CERTIFIED, TRUSTED QUALITY

FedTek is proud to announce our accreditation into the ISO 9001:2015.

The International Organization for Standardization (ISO) credential was created to help build trust between customers and companies all over the world. It is an expectation of both quality products as well as all aspects of how a business is managed.

The ISO's website explains, "The ISO 9000 family addresses various aspects of quality management and contains some of ISO's best known standards. The standards provide guidance and tools for companies and organizations who want to ensure that their products and services consistently meet customer's requirements, and that quality is consistently improved."

COMMITMENT TO QUALITY

"It is a guideline for running our company" FedTek's President, Scott Deen, says. "I've learned that the ISO standard means more than a quality product. It means we're identifying opportunities to improve the business and so we keep competitive in this global market. With an audit every year – and a new certification every 4 years – our commitment to quality has helped us grow over the long term."
