

Infrastructure Management Software Solutions

HPE Cloud Services – Achieve the cloud experience for all your apps and data, no matter where they live. Get Cloud services without the cost, risk, and time to move data and refactor apps, so you free up capital, boost operational and financial flexibility and free up your talent to accelerate your business. Choose services for your workloads in just a few clicks, pay per use, scale up and down as needed, and get everything managed for you as a service. HPE GreenLake delivers an as-a-service experience that provides on-demand capacity, combining the agility and economics of public cloud with the security and performance of on-premises IT. Accelerate your digital transformation with cloud benefits of fast deployment, scalability, and pay-per-use economics – all within the control of your own on-premises environment.

NetIQ, a Micro Focus business, is a leading provider of comprehensive systems and security management solutions that help enterprises maximize IT service delivery and efficiency.

UNITRENDS

Unitrends #1 All-in-One Backup and Recovery Appliances. Protect anything, anywhere. A single solution combining protection for physical, virtual, and SaaS environments combined with ransomware detection, self-healing backups, dark web monitoring and much more. Welcome to hassle-free data protection.

Barracuda has products that span three distinct markets: 1) Content security, 2) Network and application delivery, and 3) Data storage, protection, and disaster recovery.

Thales – Data protection leader, providing everything an organization needs to protect and manage its data, identities, and intellectual property – through encryption, advanced key management, tokenization, and authentication and access management. Whether it's securing the cloud, digital payments, blockchain or the Internet of Things, security professionals around the globe rely on Thales to confidently accelerate their organization's digital transformation.

VERITAS™

Veritas specializes in protecting your data from malware that encrypts, or locks, valuable digital files and demands a ransom to release them. Their Software-Defined Storage offers greater flexibility and choice, better economics and enterprise-class service levels. They support other programs and can give data protection and availability across leading cloud platforms.

vmware®

VMware can reduce IT costs while maintaining control without being locked into limited choices of operating systems, applications and hardware. VMware solutions can reduce hardware and the time it takes to provision new servers which decreases downtime and improves reliability with business continuity and built-in data disaster recovery.

webtrends®

Web-smart organizations worldwide depend on Webtrends to improve their web site conversions and optimize their marketing performance for maximum return on investment. Webtrends has become the trusted standard not only for award-winning technology, but also for a full range of consulting services and unmatched industry expertise.
